Tri-Guard Cameras

GUARDIAN AT NIGHT, PROTECTION ON SITE

Benefits

Most crimes happen at night, disguised by the cover of darkness. The conventional camera can't catch enough details when in dark environment. Also, the fact that conventional cameras typically alert after things happen, which hardly makes a deterrent.

UNV Tri-Guard series integrates Smart Intrusion Prevention (SIP), ColorHunter and Active Deterrence into one IP camera. It can not only alert when events happen, but also get color information in low-light environment.

Active Deterrence

The strobe light will be triggered and the built-in speaker makes sounds to drive away intruders when events happen. There are 3 modes: IR mode, warm light mode and dual-light mode.

ColorHunter

The ColorHunter Technology can turn on the warm LEDs and deliver vivid and colorful image in ultra-low light condition.

Smart Intrusion Prevention

Smart Intrusion Prevention (SIP) filters false alarm and allows people and vehicle classification to focus only on interested targets.

ColorHunter Technology
Low illumination: 0.003Lux
Warm LEDs guarantee lower light pollution

TRI-GUARD

Smart Function
Smart Intrusion Prevention
People Counting
Face Capture

High Resolution
5MP(2880*1620)@30fps
8MP(3840*2160)@20fps

2-way Talk
Built-in MIC & speaker
remote communication

Active Deterrence
Alert when event happens
strobe light will be triggered
built-in speaker makes sounds

Multiple Deterrence Modes
2 different modes fit different scenes:
Warm light mode
Dual-light mode

Deterrence modes

Warm Light Mode

Warm LEDs keep on

When a target object triggers the rule, speaker turns on

Speaker turns off

Dual-Light Mode

IR lights keep on

When a target object triggers the rule, speaker and warm LEDs turn on

Speaker and warm LEDs turn off, after a while IR lights turn on
